

HELP US LAY FOUNDATIONS FOR THE FUTURE

We are building what will be one of the world's best clinical rehabilitation centres for the armed forces. But we can't start rebuilding lives until the building itself is finished. We need your help to complete the job. Please dig deep and donate today.

DNRC

REPAIRING
OUR SERIOUSLY
WOUNDED

The Defence and National Rehabilitation Centre (DNRC) will be a remarkable facility, providing the best possible care and clinical rehabilitation for seriously wounded members of the armed forces. Construction has started on the site which is in the East Midlands. Once opened, in 2018, the DNRC will provide neurological and complex trauma care and a full suite of rehabilitative facilities together on one site, bringing benefits that could make the establishment unique in the world. Such excellence in rehabilitation medicine will also provide a significant platform for research and development in what is now a fast-moving field of science and technology.

- Repairing our seriously wounded
- Clinical rehabilitation
- Neurological care
- Getting people back to work
- Improving care for the nation
- Something to be proud of
